

# Risk Engineering

## *Identify the Hazard, Prevent the Accident*

### **PROGRAM BENEFITS**

- Understand why hazards are not always identified
- Get a “down to the detail” understanding of hazards associated with specific equipment
- Learn risk evaluation and auditing techniques
- Conduct more thorough audits and hazard assessments in less time
- Understand the benefits of a hazard identification “visual” toolbox to share knowledge

### **DAVE HILL**

Dave has built a reputation as an innovative problem solver. He has worked internationally in positions such as:

- Chief Engineer Officer
- Loss Prevention Specialist
- Principal Risk Engineer

### **OVERVIEW**

This workshop helps engineers, consultants, and industrial property insurance inspector's drill down and get to the next level in hazard identification. It provides techniques for conducting equipment hazard analyses during engineering surveys, audits, design and pre-start-up safety reviews. It also addresses effective auditing techniques. This workshop focuses on mechanical and electrical equipment, instrumentation, fire protection systems, and fire/toxic/explosion hazards.

### **AVAILABLE FORMATS:**

- Workshops
